Name:ABID ALI Assignment : Technical Report Writing

Argumentative Essay

Task1

Will AI Reshape Higher Education

Artificial Intelligence (AI) is quickly changing the way many industries function, and higher education is no exception. From tools that can grade assignments automatically to platforms that adjust lessons based on individual student needs, AI is already making its presence felt. So the real question isn't whether AI will reshape higher education it's how far this transformation will go. While some people worry that AI might replace traditional teaching, others see it as a powerful tool to improve learning and make education more accessible. AI is likely to play a major role in reshaping higher education by enhancing learning experiences, improving efficiency, and widening access, while still relying on human educators for guidance and support.

One of the biggest changes AI brings is personalized learning. In many traditional classrooms, all students are taught in the same way, even though they learn at different speeds and have different strengths. AI helps solve this problem by tailoring education to individual needs. It can analyze how a student performs, identify where they struggle, and adjust the content accordingly. For instance, students who need extra help can receive more practice and explanations, while those who learn quickly can move ahead without being held back. This kind of flexibility makes learning more effective and keeps students more engaged.

AI is also making universities run more efficiently. Many routine tasks like grading assignments, tracking attendance, or answering common student questions can now be handled by AI systems. This reduces the workload for teachers and administrative staff, allowing them to focus on more meaningful activities such as teaching, mentoring, and research. Tools like chatbots can provide instant answers to students, improving communication and saving time. Overall, AI helps institutions operate more smoothly and use their resources better.

Another important advantage of AI is that it expands access to education. With AI-powered online learning platforms, students from different parts of the world, even those in remote or disadvantaged areas can access quality education. Features like automatic translation and adaptive learning make it easier for people with different languages or learning challenges to study effectively. This helps create more equal opportunities and allows more individuals to gain valuable knowledge and skills.

Despite all these benefits, AI cannot replace human teachers. Education is not just about delivering information, it also involves motivation, mentorship, and the development of critical thinking. Human interaction plays a crucial role in shaping a student's overall learning experience. If we rely too much on AI, we risk losing that important human connection. That's why AI should be seen as a tool that supports teachers, not replaces them.

In conclusion, AI is set to significantly reshape higher education by making it more personalized, efficient, and accessible. However, its true success will depend on how well it is balanced with human involvement. When used wisely, AI can enhance education without losing the human touch that makes learning meaningful.

Memo Writing

Task2

Situation 1

You are the office manager and want to remind everyone to clean up after themselves in the lunchroom. There was recently an infestation of cockroaches. The building has since been fumigated but you still require the cooperation of staff to prevent a re-infestation. State the purpose of the memo, your reason(s) for sending it (i.e. the kind of behavior you have noticed) and what actions you want taken.

To: All Staff
From: Office Manager
Date: April 16, 2026
Subject: Maintaining Cleanliness in the Lunchroom

This memo is to remind all staff to maintain cleanliness in the lunchroom area. Recently, we experienced a cockroach infestation due to leftover food, unclean dishes, and improper waste disposal. Although the building has been fumigated, such conditions can easily lead to the problem occurring again.

It has been observed that some employees leave food scraps, do not clean their dishes, and fail to dispose of garbage properly. This behavior creates an unhygienic environment and increases the risk of pests returning.

All staff are requested to clean up after themselves immediately after using the lunchroom. Please wash your dishes, wipe down surfaces, and dispose of waste in the proper bins. Your cooperation is essential to maintain a clean and safe workplace.

Situation 2

you are an administrative assistant. You want to tell 10 people about an upcoming computer training seminar. You are attaching a brochure about the seminar from the presenter, but you also need to inform them of the following: • what the training is for • who the presenter is, including a brief statement about his/her background • where the training will be held, including the date and time • whether or not parking is available • whether or not lunch and/or any refreshments will be served.

To: IT Department Staff
From: Administrative Assistant
Date: April 16, 2026
Subject: Upcoming Computer Training Seminar

This memo is to inform you about an upcoming computer training seminar aimed at enhancing your technical skills and knowledge of modern software tools.

The training will be conducted by Mr. Ali Khan, a certified IT professional with over 10 years of experience in software development and corporate training. The seminar will take place on April 25, 2026, from 10:00 AM to 3:00 PM in the main conference hall. Parking facilities are available for all participants. Lunch and light refreshments will also be provided during the session.

Please find the attached brochure for detailed information about the seminar. All staff members are encouraged to attend and confirm their participation by April 20, 2026.

Situation 3

Write a memo about a topic of your choice. Tell recipients the purpose of the memo, your reason(s) for sending it and what action (if any) you want taken. Provide suggestions in your memo if appropriate.

To: All Employees
From: IT Department
Date: April 16, 2026
Subject: Implementation of New Password Security Policy

This memo is to inform all employees about the implementation of a new password security policy to enhance the organization's cybersecurity.

Recently, there has been an increased risk of cyber threats due to weak passwords and poor security practices. To address this issue, all employees are required to update their passwords regularly and follow secure password guidelines.

Employees must create strong passwords using a combination of letters, numbers, and symbols. Passwords should be changed every 30 days and must not be shared with anyone. Your cooperation is necessary to ensure the safety of organizational data and systems.

Email Writing

Task3

Dear Sir Muhammad Hassan Abbasi,

I hope you are doing well. My name is Abid Ali (Roll No. 23-CSE-42), and I am a student of the Computer System Engineering (CSE) department. I am writing to respectfully request an extension for the upcoming assignment due to unforeseen circumstances.

The assignment is due on 12-04-26, and unfortunately, I have encountered unexpected circumstances that have affected my preparation and progress. Despite my sincere efforts to manage my time effectively, I am unable to complete the assignment to the required standard within the given deadline.

I kindly request an extension of a few days so that I can complete and submit the assignment properly. I assure you that I am fully committed to the course and will submit the work as soon as possible within the extended timeframe.

I would be very grateful for your understanding and consideration. Please let me know if any additional information is required.

Thank you for your time and support.

Sincerely,
Abid Ali
Roll No. 23-CSE-42
Computer System Engineering (CSE)

Positive Message

Task4

Dear Team,

I hope you are all doing well. My name is Abid Ali, and I have recently joined Befiler (Pvt) Limited as an IT intern. I am excited to be a part of this organization and to work alongside such a professional and talented team.

I chose to join Befiler because of its strong reputation for innovation and excellence in the industry. I am particularly interested in the ongoing projects within the IT department and look forward to learning from your experience and contributing wherever possible. As an intern, I am eager to support the team, enhance my technical skills, and add value through my dedication and hard work.

I look forward to meeting and working with all of you. Please feel free to reach out to me—I will be available at Desk No. [Your Desk Number]. I am excited to build a positive and professional relationship with everyone.

Thank you, and I look forward to collaborating with you all.

Best regards,
Abid Ali
IT Intern

Negative Message

Task5

Dear Sir,

I hope you are doing well. Thank you for arranging the training session on “Using Social Media in the Hospitality Industry.” It is indeed a valuable opportunity for professional development.

Unfortunately, due to some unforeseen circumstances, I will not be able to attend the session. I have an urgent personal commitment that requires my immediate attention, and it overlaps with the scheduled timing of the training. I regret any inconvenience caused and understand the importance of this session.

As an alternative, I would be grateful if I could access any training materials, recordings, or notes from the session. I am also willing to attend a future session or complete any related tasks to ensure I do not miss out on the learning.

I sincerely appreciate your understanding and support. I remain committed to my responsibilities and look forward to continuing my work effectively.

Thank you for your consideration.

Sincerely,
Abid Ali
IT Department

Persuasive Message

Task6

Dear Sir,

I hope you are doing well. I am writing on behalf of my classmates regarding an idea that many of us found exciting after our recent discussions about emerging technologies in **Computer System Engineering**. We believe that inviting a real-world professional to speak with our class could help us better understand how these concepts are applied in the industry and inspire students to explore these fields further.

We would like to suggest inviting a **Computer Engineering professional**, such as an embedded systems engineer, hardware engineer, cybersecurity analyst, or AI developer, for an informative session. Many students in our class are very interested in learning how the topics we study—such as computer architecture, hardware–software interaction, and modern computing technologies—connect to real-world applications. Hearing directly from someone working in the field would help us understand practical challenges, industry tools, and career opportunities related to our coursework.

Such a session could provide valuable insights into the professional world and motivate students to plan their career paths more effectively. A professional's real-life experiences, advice, and examples would make our learning more meaningful and help bridge the gap between theoretical knowledge and practical implementation in the field of computer engineering.

If you think this idea would be beneficial, we kindly request your approval to move forward with it. We would be happy to help coordinate or assist in organizing the session if needed. Thank you very much for considering this suggestion. We truly appreciate your support in creating engaging learning opportunities for students.

Sincerely,
Abid Ali

Task7

Tasksheet Week 7: User Manual

Task 1: Correct the errors in the following instructions. Some may already be correct. Rewrite only the corrected version.

a. Allow the glue to dry adequately.	Correct
b. Drag and drop to quickly and in an easy manner rearrange headings and the content beneath them.	Drag and drop headings and their content to rearrange them easily.
c. Just save the document to see changes from other editors as you work. Your changes also become available to other editors each time you save.	Save the document to see edits from others and share your own.
d. Push the stem into the fork tube a few inches in as shown in the figure.	Push the stem into the fork tube several inches (see Figure).
e. After having used the equipment, sliding the temperature sensor back into its holder on the side of the control base is highly recommended.	Slide the temperature sensor into its holder after use.

Task 2: Write step-by-step instructions for ONE of the following tasks. Use imperative verbs, one action per step, logical sequence and maximum 8 steps. Choose anyone from the list:

- ⇒ Inserting pictures in PowerPoint slides
- ⇒ Changing font type and size in MS Word
- ⇒ Inserting tables in MS Word
- ⇒ Printing a Word document
- ⇒ Sharing files via Bluetooth between two mobile phones

Changing font type and size in MS Word

Select the text you wish to modify.
Navigate to the **Home** tab on the top ribbon.
Locate the **Font** group.
Click the drop-down arrow next to the current font name. 5. Select your desired font style from the list.
Click the drop-down arrow next to the font size number.
Choose a new size or type a specific number and press **Enter**.
Click anywhere on the document to deselect the text.

Task 3: Choose any mobile app or software you frequently use.
Application: WhatsApp

List 5 Features of the Application	**Rewrite as a Task a User Performs**
End-to-end Encryption	Secure your private conversations.
Status Updates	Share a photo or text update with your contacts for 24 hours.
File Attachment	Send a PDF document or image to a colleague.
Group Chat	Create a discussion group for a project team.
Voice/Video Calling	Make a real-time video call to a friend.

Task 4: Imagine you are going to write a manual for a locally available app. Fill in the blueprint below.

Application Name:	Bykea
Target User Group:	Daily commuters and individuals needing quick parcel deliveries in urban Pakistan.
What problem does this app solve?	It provides affordable, on-demand transportation and courier services to bypass heavy traffic.
List 5 Core User Tasks (NOT features)	Book a bike ride to a specific destination. Send a parcel from one location to another. Top up your mobile balance using the app wallet. Request a cash collection or delivery. Track a driver's real-time location.
Possible User Difficulties: What might confuse a new user?	Pinning the exact pickup location on the map and understanding the fare breakdown (base fare vs. peak factor).
Proposed Manual Sections	Bold what you will include: ☐ **Introduction** ☐ **Installation Guide** ☐ **Account Setup** ☐ **Task-Based Instructions** ☐ **Troubleshooting** ☐ **FAQ** ☐ Glossary ☐ Index
What do you think will be the most difficult section to write?	**Troubleshooting.** It requires anticipating various technical glitches (GPS lag, payment failures) and providing solutions that work for users with different levels of tech literacy.

Task8

Task sheet Week 8: How to read a research paper?

Instructions: Select one of the research papers (Empirical study not a review article) you used for assignment 1**.** Read the Introduction section of the paper carefully to identify how the author(s) develop the research problem by locating the following elements:

Þ **Context** – Background information about the topic or research area
Þ **Importance** – Why the issue is significant or needs attention
Þ **Research Gap** – What limitation, missing area, or unresolved issue exists in previous research Þ **Purpose of the Study** – What the authors aim to investigate or achieve

Research Paper

Machine Learning-Based Intrusion Detection System: A Survey **by Ahmad Javaid et al.**

Task 1: Complete the table below using sentences or summarized ideas from the paper.

	Explanation in your words (Use paraphrase technique)	**Evidence(sentence from the paper)**
Context	Cybersecurity is becoming more important because networks are expanding rapidly and threats are increasing.	"With the rapid growth of network-based services, the number of cyber attacks has increased significantly."
Importance	It is important to protect systems because cyber attacks can cause serious damage to data and systems.	"These attacks pose serious threats to the confidentiality, integrity, and availability of information systems."
Research Gap	Existing traditional intrusion detection systems cannot effectively detect new and complex attacks.	"Traditional IDS techniques are not sufficient to detect sophisticated and emerging threats."
Purpose of study	The study aims to explore how machine learning can improve intrusion detection systems.	"This paper focuses on the application of machine learning techniques to enhance intrusion detection systems."

Task 2: Based on your analysis above, write a clear research problem statement that summarizes the issue the selected study addresses:

Research Problem Statement (2-3 sentences)
Traditional intrusion detection systems are unable to effectively detect modern and sophisticated cyber attacks, creating serious security risks for network systems. This limitation highlights the need for improved detection techniques. Therefore, this study aims to explore the use of machine learning methods to enhance the performance of intrusion detection systems.

Task: Review three empirical research papers (you already have from assignment 1) related to your domain or area of interest.

Structured notes for each paper using the template below.

Author	Year	Title	Keywords	Research Context	Research Problem	Contribution	Method	Key findings
Ahmad Javaid et al.	2016	Machine Learning-Based Intrusion Detection System: A Survey	IDS, ML, Cybersecurity	Growth of networks increases cyber threats.	Traditional IDS cannot detect modern attacks.	Reviews ML techniques for IDS.	Comparative analysis of ML algorithms.	ML improves detection accuracy.
Yisroel Mirsky et al.	2018	Deep Learning in Cybersecurity: A Review	Deep Learning, AI, Security	Cyber threats are becoming complex.	Traditional systems fail with complex data.	Explores deep learning in cybersecurity.	Review of DL models.	DL detects complex threats effectively.
Abdul Rahman et al.	2017	Security and Privacy Issues in IoT: A Survey	IoT, Security, Privacy	IoT devices are rapidly increasing.	IoT lacks strong security mechanisms.	Identifies IoT security challenges.	Survey of IoT issues.	IoT faces major security risks.

Research Papers 1

- Title: *"Machine Learning-Based Intrusion Detection System: A Survey"*
- Authors: Ahmad Javaid et al.

Research Papers 2

- Title: *"Deep Learning in Cybersecurity: A Review"*
- Authors: Yisroel Mirsky et al.

Research Papers 3

- Title: *"Security and Privacy Issues in Internet of Things (IoT): A Survey"*
- Authors: Abdul Rahman et al.
